## Explanatory Notes

* The sources of data used in this publication are explained below:
- Most of the information in "Students", "Teachers", "Schools", "Levels of education" "Foreign language learning" and part of "Information and communication technology in education" is drawn from statistics on non-university education prepared by the Unit of Statistics and Studies (General Technical Secretariat- MEFP), under a statistical cooperation framework with the autonomous communities through the Education Sector Conference. Data are generally drawn from the definitive data of several school years, the 2022-2023 data are preliminary and 2023-2024 are estimates. These statistical sources are not expressly cited in the tables presented here.
- The rest of the sources used are mentioned at footnotes, especially in "Investment in education", "The social dimension of education: scholarships and student grants", "Educational attainment; outcomes and returns", "Educational action abroad" and "International mobility in education."

Q Different school and calendar years are used in the sections of the publication, depending on the information available. Forecasts of the basic variables students and schools for 2023-2024 have been made. For the rest of the information, the latest available statistical data have been used. For trends data, five and ten-year comparisons are generally presented, together with comparisons with the previous school year. Note that for the Statistics of Information and Communications Technologies in Schools, the data for the 2020-2021 school year are maintained, given that it is carried out bienally, as is the case with the digital skills data referring to 2021.

* This publication does not cover university education, except in sections concerning the education system as a whole (e.g. investment in education, scholarships and aid, data on population educational attainment level).
- Students with a specific need for educational support include students who require and receive attention different from ordinary care due to special educational needs, developmental delays, language and communication development disorders, learning disorders, serious lack of knowledge of the language of learning, being in a situation of socio-educational vulnerability, due to their high intellectual abilities or due to having joined the educational system late.
- Trends on "Public expenditure on education" are presented in two columns, with financial chapters included and excluded. Data excluding financial chapters leave out a spending component that introduces a high degree of fluctuation in the series that hampers analysis of the development of real expenditure on education and its associated indicators. It also enables the presentation of figures more in line with international indicators, since the international education statistics methodology shared by the OECD, Eurostat and UNESCO does not take into account the financial expenses that Spain classifies into chapters 3,8 and 9 when recording public expenditure on education.
* Net enrolment rates are defined as the ratio between the number of students of a certain age or age group that is enrolled for the studies at issue and the total population of that age or age group. The following programmes from the Education System are included for the calculation of rates: non-university General Education System programmes, University education, Professional studies of Music and Dance (students aged 16 and over), Vocational training in Arts and Design, Higher studies in Arts and Design, Levels B2, C1 and C2 Languages programmes (students of 16 and more), Sport studies of the Specialised Education System and Initial and Secondary education for adult people. The source of population data is Estadística Continua de Población of INE.
* Activity rates are defined as the percentage of the population aged 16 or over that meets the conditions for inclusion among employed or unemployed people. Unemployment rates are defined as the percentage of active population that is not employed, seeking a job and available for working.
* Annual wage indexes are calculated considering the average annual wage of total population (men and women as a whole) to be equal to 100, and all other wages are expressed as ratio to this average.
* Educational activity conducted by the Ministry of Education and Vocational Training abroad (see page 40) is designed to address the needs of the Spanish population residing abroad and to promote and spread Spanish language and culture in other countries. This activity covers the following:
- Spanish government-owned schools, whose objective is to provide services for Spanish people residing outside Spain and to extend Spanish language and culture and our education system in the countries where the schools are located.
- Dual ownershipschools, where the Spanish government is one of the owners and an integrated curriculum is taught to students who obtain a double certificate.
- Spanish sections in schools owned by other countries, where certain areas of learning from the Spanish education system (Spanish Language and Literature, and Geography and History of Spain) are taught to Spanish and foreign students.
- Spanish sections in European schools, where the regulated content of the schools' specific programme is taught in the Spanish language.
- Spanish heritage schools, which are specific programmes for the children of Spanish people residing abroad.
- Schools under special agreements enabling Latin-American and Spanish students residing outside Spain to obtain the academic certificates of their place of residence and Spanish academic certificates, by adding supplementary studies in Spanish Ianguage, Literature, and Geography and History.
- Bilingual sections in schools owned by governments of countries in central and eastern Europe and China, in which, depending on the country, Spanish Language and Literature, Spanish Foreign Language, and Geography, History and Culture of Spain are taught, as well as various non-linguistics subjects in Spanish. Its students have the possibility of obtaining the Spanish Baccalaureate Degree.
- International Spanish Academies (ISA), in non-university formal education institutions in Australia, Canada and the United States where an integrated language and content curriculum is taught in Spanish.

Q International educational mobility section (see page 41) presents information from the Erasmus+ program which in its first period covered from 2014 to 2020 and in its continuation from 2021 to 2027, presenting provisional results for the 2022. It is the European Union programme supporting actions in the fields of education and training, youth and sport. The program is part of the idea that education, training and formal and non-formal learning beyond the borders of the EU, with a clear vocation for internationalization, opening up to third countries, being the key to job creation and improving the competitiveness of Europe. Actions managed from the national agencies in a decentralized way in the fields of education and training are the following (Call 2022):

## Explanatory Notes

- Mobility of people based on learning (Key action 1):
- Staff mobility, especially teachers, trainers and managers in all sectors of education and training (school education, vocational education and training, higher education and adult education).
- Mobility of students of vocational training and higher education.
- Cooperation for innovation and exchange of good practices (Key action 2):
- Strategic partnerships between organizations of education, training and other relevant actors.
* Some sections of this document also present data on the situation of education in Spain within the European framework, as published fundamentally by Eurostat and calculated using the international methodology.

This information is presented using the education levels established in ISCED 2011 (International Standard Classification of Education 2011):

- ISCED 0: Early childhood education
- ISCED 1: Primary education
- ISCED 2: Lower secondary education
- ISCED 3: Upper secondary education
- ISCED 4: Post-secondary non-tertiary education
- ISCED 5: Short-cycle tertiary education
- ISCED 6: Bachelor's or equivalent level
- ISCED 7: Master's or equivalent level
- ISCED 8: Doctoral or equivalent level
* The symbols used in this publication are:
- «..» Data not available.
- «-» Null value.
- «x» Data included under another heading.

[^20]:    (1) This includes the range of programmes that guarantee teaching of this type in every grade of each cycle of compulsory education (primary school and/or compulsory secondary school) at least and may also include second cycle of early childhood education and/or post-compulsory education.
    (2) This includes experiences that include the use of a foreign language as the teaching language for one or more areas or subjects other than foreign language class, as a means of gaining a deeper knowledge of the foreign language. These experiences are not generally oriented toward continuing throughout every grade of the compulsory cycles and may sometimes even depend on the availability of teaching staff who can participate at the school.

[^21]:    (1) See definition of programs and initiatives of the International Education Unit (UAEE) in the section of explanatory notes.
    (2) Includes the total number of teachers, technical advisors and language assistants.
    (3) The 135 ISA teachers are also part of the Visiting teacher program, so they appear in both categories.
    (4) Includes the total number of Language and Culture Assistants ( 854 Spaniards abroad and 7.187 foreign participants in Spain)
    (5) Studies pursuant to the education system.
    (6) Spanish language and culture and Spanish as a second language.
